From private donors		40
Volumes purchased during year		0
Volumes borrowed from Bristol library		27

Discards

The term "discards" should not be interpreted to mean "trash". In this way we obtain, (duplicates in some library perhaps) numbers of books which have literary merit and circulate well, (along with a certain amount of lightweight or outmoded ones.) For example, this year we obtained brand new copies of "Forbes, Paul Revere and the World He Lived In", "Stone, The President's Lady", "The Lincoln Reader edited by P. M. Angle" and others of like value. The amount of good material obtainable in this way justifies the practice.

Books for Public Schools

Both of the schools in Alexandria are served by the Bookmobile.

Winter Books

It is necessary to close for the winter because of inadequate heating. Books taken out during the month of

November are not due until May of the coming year. Quite a number of our patrons like to fill a bookshelf in their homes with books from the library to read during the winter. Alexandria students in the Bristol schools find this a convenient way to obtain books for book reports, oral or written. The librarian is building a collection of books suitable for this purpose and welcomes all students looking for materials.

The library has been open on Saturdays from 11 a.m. to 4 p.m. from May 1 to November 20, with the exception of September 25, when the librarian took a "bus man's holiday", going to Albany, N.Y. for ten days' study in museum and state library there. Such excursions into other libraries and places interested in literature do a good deal to refresh the librarian and keep her on her toes. The library is now closed but will reopen the first Saturday of May, 1955, and all books taken out previous to closing are due then.

SUPERINTENDENT'S REPORT

We quite often see articles in newspapers and magazines written by nationally syndicated columnists "pan-n'ng" education and "telling" educators what ought to be done. Simply because one becomes an authority in the field of politics, foreign affairs, farm subsidies, or even football, does not qualify one as an expert in all things. The expert on what can be done in an ungraded rural school is to be found in an ungraded rural school; the expert on what can be done in a small high school is to be found in the small high school. These columnist experts are unacquainted with the "educational facts of life" and will remain so until such time as they actually spend a year, more or less, in an actual situation teaching the pupils themselves. Of course **they can not afford** to do this and a quick, superficial survey plus a few interviews and a posed picture or two must be the basis of material for an expression of opinion. Unfortunate it is that their opinions are so widely read, and believed. Now all of us in the educational field can improve our work and have the potential of always doing a better job. Much remains to be discovered and learned in the field of human conduct, but for a college president or a noted columnist to write that **all** pupils in high school should have a couple of years of Latin, or three years of college preparatory mathematics is too absurd to merit additional space. Our pupils must be taught to read current publications with the proverbial grain of salt. Freedom of the press is not license, and carries on its shoulders the greatest of responsibilities.

Once again we enter a legislative year with political leaders of both parties pledged to no new sources of tax revenue which simply means that the local property tax will continue to bear the major part of increased costs of educating our children. Even granting the possibility

of a stable economy, costs of education will increase where: 1) There are significant increases in the school population; 2) There is need of extensive remodeling or new buildings; 3) Where new educational offerings become necessary; 4) Where there is competition for teachers. There is an old, and elementary, law to be found in any high school economics text book that where there is a limited supply and an increasing demand for a commodity the price will increase. Numerically there will be a shortage of teachers for many years ahead; qualitatively speaking there is always a shortage. Teachers have the benefit now of being in the driver's seat of a "selling market". Until such time as state aid becomes available in sufficient quantity to absorb these increasing costs the local property owner will pay the bill. Only when this condition has been met will state aid, in still larger quantities, be of any great value in lessening the burden on the property owner. If you, as a property owner, are willing to absorb these costs there is, and will be, no need of new taxes; if you really want tax relief new sources of revenue are necessary, in the opinion of the writer. To say that it doesn't make any difference because the consumer pays the bill anyway is to overlook the fact that different people consume different things, and all consumers in the State of New Hampshire do not live here "the year round" nor do they all own property! There are several towns in this union which could well use several times the aid now being received. Other towns can not have modern buildings until special building aid is allocated from a higher level, either state or federal. What do you want for your children? Are you willing to "pay the freight" on present tax basis? These are the vital questions. The squeaky wheel gets the grease. Legislators have sensitive ears!

The Willow School has been remodeled with considerable satisfaction to all. We still have the problem of too much surface water in the drain field and it may be

necessary to make additional or deeper ditches to take care of this problem. On the other hand the past year has been such a wet one that it is quite probable that the drain field will be all right in an ordinary year. The building should eventually have additional lighting. A lighter floor would aid materially in better lighting and should be considered at some future time.

Material changes in school housing do not of themselves guarantee improved learning. Most Alexandria pupils do not have the benefits of music or handwriting supervision, and they need both, nor can they have the benefits of supervised activities such as bands, plays, basketball, baseball, and ordinary playground activities, not to mention shop and home economics, all of which are very necessary, particularly for the older pupils approaching high school age. Just the ordinary values derived from competing with many others their own age should not be forgotten. It is increasingly difficult to find qualified teachers, or those whom the state will permit to teach, to fill rural school positions. As a matter of fact, it is difficult to find any teacher for any position, that of the rural school being one of the more difficult, and hence a matter of degree rather than a new problem. Married teachers within commuting distances seem to be the only answer. The present day graduate has his choice of positions, and the very best are in a national market. They are not choosing rural schools.

C. MAURICE GRAY,
Superintendent of Schools

SUPERVISORY UNION NO. 4 BUDGET

N.H. Laws Chapter 135, paragraph 43. "The school boards of the several districts forming a supervisory union shall meet between April first and June first in each year at a time and place fixed by the chairmen of the several boards, and organize by choosing a chairman, a secretary and a treasurer. They shall, when necessary, nominate a superintendent or superintendents, fix the salary or salaries, and apportion the same among the several districts and certify the apportionment to their respective treasurers and to the state board of education."

Chapter 135, paragraph 47. "At a meeting held before January first of each year the supervisory union board shall adopt a budget required for the expenses of the supervisory union for the next fiscal year, which budget may include the salary and expenses of supervisors of health, physical education, music, art and guidance, and any other employees, and expenses necessary for the operation of the supervisory union. . . . The basis for apportionment shall be one-half on the average membership of the previous school year and one-half on the last adjusted (Ch. 157, 1951) valuation of the district."

The chart of expenses is based on action taken by the union.
